Get precision fit by our Professionals and the Nike 360 fitting system at Kokanee Springs Resort Club.

Nike Golf Introduces Complete 360° Fitting System Nike Fitting System Fits Every Club from Driver to Lob Wedge.

Nike Golf has taken one giant leap towards advancing innovation and customization in club fitting with the introduction of its new 360 Fitting System.

The complete Nike Golf 360 Fitting System is distinguished by the fact that it provides a full bag fitting system - hence, golfers can maximize their performance on the course by being fit for every club in their bag ranging from the driver to the lob wedge. When coupled with the proprietary Nike IFS (Intelligent Fitting System) software and launch monitor, the 360 Fitting System will provide golfers with a tour-level fitting experience.

The new Nike Golf Fitting System also addresses gap yardage club-fit solutions (i.e. fairway to iron, pitching wedge to approach wedge) and provides club type logic (i.e. hybrid or iron, #3 wood or #4 wood) throughout the set. This standout technology optimizes distance, ball flight and accuracy throughout the set, leading to enhanced performance.

"We are thrilled to have developed a complete club fitting system that has already received tremendous feedback by our test fitters in the marketplace," said Stan Grissinger, Category Business Director for Clubs and Balls for Nike Golf. "This is just one step in Nike Golf's ongoing commitment to providing golfers with a complete performance package to enhance their game - from head to toe."
